PROFILE SUMMARY

Flutter Developer with 2+ year of experience building cross platform mobile applications using Flutter and Dart. Skilled in responsive ui & ux development, state management and MVVM architecture. Proficient in Provider, Riverpod, BLoC, GetX, Frappe/ERPNext, MySQL, and Hive. Strong focus on developing scalable, maintainable, and user friendly applications with clean and efficient code.

TECHNICAL SKILLS

- **Programming Languages:** Dart
- **Mobile Development:** Flutter, Android, iOS, Responsive UI & UX
- **State Management:** Provider, Riverpod, BLoC, GetX
- **Architecture:** MVVM, Clean & Maintainable Architecture
- **UI Development:** Flutter Widgets, Material Design, Custom UI Components, Responsive Layouts
- **Device Features:** GPS, Geolocation, Geofencing, Camera, File Uploads, QR Code Scanning
- **Notifications & Services:** Firebase, Push Notifications
- **Databases:** MySQL, Hive

EDUCATION

Bachelor of Computer Applications (BCA)
University of Calicut | 2021 – 2024

WORK EXPERIENCE

Flutter Mobile Application Developer
Cloud Native IT Solution, Dubai, UAE | Sep 2025 – Present

- Developed and maintained cross platform Flutter applications for ERP, CRM, HR, salon, garage, tailoring, and food delivery business workflows across Android and iOS
- Developed key features including Razorpay payment integration, Google Maps integration, real time delivery tracking, location based services, subscriptions, and order management
- Integrated Frappe/ERPNext REST APIs using Dio and implemented authentication, role based access, dynamic forms, dashboards, and data driven features
- Built reusable UI and service components and implemented offline first functionality using Hive, including offline attendance and billing with automatic synchronization when network connectivity is restored

Flutter Mobile Application Developer Trainee
Incube Innovation Incubator LLP, Hyderabad, India | Jul 2024 - Jan 2025

- Worked on Flutter mobile applications using Dart, focusing on responsive and user friendly interfaces.
- Integrated REST APIs and handled JSON data, loading states, and API errors
- Used Provider for state management and followed MVVM architecture in application development
- Worked with senior developers to develop, test, debug, and improve Flutter application features

PROJECTS

IBS ERP - ALD App | Apr 2026

Description: HR and logistics management platform that streamlines attendance, leave, expenses, salary processing, and delivery operations.

- Developed HR and logistics modules using Flutter and Frappe/ERPNext, including leave, expense, salary, delivery trips, and dashboards.
- Implemented face verified GPS check-in with geofencing, Hive based offline storage, and automatic synchronization for attendance workflows.

CRM Mobile App | Aug 2026

Description: Mobile CRM platform that simplifies lead, deal, contact, task, call, and customer relationship management.

- Developed a cross platform CRM application with modules for leads, deals, tasks, contacts, organizations, calls, and notes.
- Integrated Frappe/ERPNext REST APIs using Dio with session based authentication, secure storage, KPI dashboards, and reusable MVVM components.

Khayatti Tailoring ERP | Jun 2026

Description: Tailoring business management platform that handles staff, attendance, tasks, and daily shop operations.

- Developed a multi tenant tailoring ERP application using Flutter, GetX, and REST APIs for managing staff, attendance, tasks, and daily operations.
- Implemented JWT authentication, secure token storage, role based workflows, notifications, and admin HR dashboards.

Garage Mobile App | Jan 2026

Description: Workshop management platform that streamlines vehicle intake, estimates, job cards, inspections, work orders, and delivery.

- Developed a workshop management application covering vehicle intake, estimates, job cards, work orders, quality checks, washing, and vehicle delivery.
- Integrated Frappe/ERPNext APIs with QR code generation/scanning, vehicle damage inspection, photo capture, digital signatures, and gate pass workflows.

Salon App | Nov 2025

Description: Salon management and POS platform that handles appointments, billing, inventory, staff attendance, and daily operations.

- Developed a Flutter based salon POS and management application with appointment booking, invoicing, inventory, reporting, and multi branch support.
- Implemented role based workflows for admin, manager, and staff, including face recognition attendance and Hive based offline billing

FoodiaQ | Sep 2025

Description: Food ordering and subscription platform that simplifies meal ordering, online payments, delivery tracking, and location based services

- Developed a food ordering and subscription application with search and filtering, restaurant/chef listings, order management, and subscription based meal services.
- Integrated Razorpay payments, Google Maps, location based services, delivery tracking, and real time order status updates.
